

Capabilities for Innovation

In the middle of southern Sweden you will find MSE Weibull AB – a company with a long tradition of finding new solutions and integrating complex systems. Here you will find a company with the ability to see possibilities instead of problems, to invent the particular detail that becomes vital to the success of a product or a system and which makes a difference. We recognise the challenge in being able to change and develop in order to collaborate with our partners in producing tomorrow's systems for training and simulation. For more than 50 years MSE Weibull have been working together with the industry and different civil and military organisations and today we have a unique network of contacts and abilities for continued creative development.

Your independent partner

You can depend on MSE for a one-off project or as a long-term business-to-business partner. We are independent and have a long tradition of working together with different defence industries all over the world. In addition we collaborate with qualified customers within the civil manufacturing industry, which provides invaluable experience creating cost-efficient and quality-assured products. Our independent position is based on the long-term, solid confidence our customers place in us.

A chain of capabilities

MSE has a long tradition of working in the defence sector and are specialists in the areas of simulation and training equipment. We supply products, sub-systems and complete advanced systems on different levels; we produce prototypes and integrate with various types of platforms and systems. We often work as a partner on a local level working with adaptations and integration in addition to the maintenance and operation of different systems. MSE is a total collaboration partner that offers the entire chain of services – from project management, requirement analysis, system design, construction, documentation and manuals to service and support. We perform serial production of systems for several of our customers and provide support during the entire life-cycle of the system. We also assume total functional responsibility for the systems we supply.

Satisfied customers and users

The combination of a functional working methodology with the user in focus and a developed quality assurance system provides advantages through all aspects of the collaboration. The right quality, flexibility and financial responsibility, respecting time-tables and following-up on deliveries are all phases of in our working methods that are important and appreciated.

Our quality assurance system confirms an on-time delivery rate of 100% and customer satisfaction enjoys a similar position. We work efficiently and economically. We are able to provide excellent references in the form of satisfied customers and users.

Platform for flight simulator

Training equipment for top performance

MSE has a significant amount of military know-how, which is valuable in the development of realistic and user-friendly systems. The Weibull name is well known to users after more than 50 years in the industry. Our own programme of military products includes trainers for ammunition handling and loading for battle-tanks and artillery, target systems for laser and firing with live ammunition, rewinding devices for communications cables and much more. These are products that have been developed in collaboration with the Swedish Armed Forces and which are used by different units all over the country.
